

Schema Design For Netflix

- Every user has email, password
- Every user can have upto 5 profiles
- Each profile has a name and pin
and type.

→ Netflix has videos

Video

→ A ~~Movie~~ has a name, description,
list of cast.

→ A TV ~~Season~~ has name, cover, and
description to episodes

→ Each Season consists of multiple
episodes

→ ~~We~~ need for every movie / episode
we need to store if it is
- watched / in progress. If in progress,
last watch slot.
